

EQUUS MUSCLE

500 ml.

Sportshorses who regularly participate in competitions and daily undergo intense training may sometimes have sore muscles and joints. Therefore, it is a good idea to care for the horse with a soothing massage. A muscle cream that penetrates deep into the muscles and also has a relaxing effect can be an advantage to accomplish this.

WHY EQUUS MUSCLE?

EQUUS MUSCLE is a non-perfume massage cream, but with a high content of Japanese peppermint oil. The product does not contain any parabens or preservatives.

Peppermint oil has a warming effect on the skin, which is particularly activated during the massage. After the massage, the peppermint oil will have a cooling effect on the area. The combination of heat and cold has a soothing effect on muscles, joints, tendons, and local swelling.

PRODUKT DESCRIPTION

Peppermint oil cream for massage. The product relieves sore joints and muscles and helps the tendons recover faster. Furthermore, the product has an effect on local swelling.

The product does not contain perfume, parabens or preservatives.
